ASSURANCES - NON-CONSTRUCTION PROGRAMS

Public reporting burden for this collection of information is estimated to average 15 minutes per response, including time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding the burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to the Office of Management and Budget, Paperwork Reduction Project (0348-0040), Washington, DC 20503.

PLEASE DO NOT RETURN YOUR COMPLETED FORM TO THE OFFICE OF MANAGEMENT AND BUDGET. SEND IT TO THE ADDRESS PROVIDED BY THE SPONSORING AGENCY.

NOTE: Certain of these assurances may not be applicable to your project or program. If you have questions, please contact the awarding agency. Further, certain Federal awarding agencies may require applicants to certify to additional assurances. If such is the case, you will be notified.

As the duly authorized representative of the applicant, I certify that the applicant:

1. Has the legal authority to apply for Federal assistance and the institutional, managerial and financial capability (including funds sufficient to pay the non-Federal share of project cost) to ensure proper planning, management and completion of the project described in this application.
2. Will give the awarding agency, the Comptroller General of the United States and, if appropriate, the State, through any authorized representative, access to and the right to examine all records, books, papers, or documents related to the award; and will establish a proper accounting system in accordance with generally accepted accounting standards or agency directives.
3. Will establish safeguards to prohibit employees from using their positions for a purpose that constitutes or presents the appearance of personal or organizational conflict of interest, or personal gain.
4. Will initiate and complete the work within the applicable time frame after receipt of approval of the awarding agency.
5. Will comply with the Intergovernmental Personnel Act of 1970 (42 U.S.C. §§4728-4763) relating to prescribed standards for merit systems for programs funded under one of the 19 statutes or regulations specified in Appendix A of OPM's Standards for a Merit System of Personnel Administration (5 C.F.R. 900, Subpart F).
6. Will comply with all Federal statutes relating to nondiscrimination. These include but are not limited to: (a) Title VI of the Civil Rights Act of 1964 (P.L. 88-352) which prohibits discrimination on the basis of race, color or national origin; (b) Title IX of the Education Amendments of 1972, as amended (20 U.S.C. §§1681-1683, and 1685-1686), which prohibits discrimination on the basis of sex; (c) Section 504 of the Rehabilitation Act of 1973, as amended (29 U.S.C. §794), which prohibits discrimination on the basis of handicaps; (d) the Age Discrimination Act of 1975, as amended (42 U.S.C. §§6101-6107), which prohibits discrimination on the basis of age; (e) the Drug Abuse Office and Treatment Act of 1972 (P.L. 92-255), as amended, relating to nondiscrimination on the basis of drug abuse; (f) the Comprehensive Alcohol Abuse and Alcoholism Prevention, Treatment and Rehabilitation Act of 1970 (P.L. 91-616), as amended, relating to nondiscrimination on the basis of alcohol abuse or alcoholism; (g) §§523 and 527 of the Public Health Service Act of 1912 (42 U.S.C. §§290 dd-3 and 290 ee-3), as amended, relating to confidentiality of alcohol and drug abuse patient records; (h) Title VIII of the Civil Rights Act of 1968 (42 U.S.C. §§3601 et seq.), as amended, relating to nondiscrimination in the sale, rental or financing of housing; (i) any other nondiscrimination provisions in the specific statute(s) under which application for Federal assistance is being made; and, (j) the requirements of any other nondiscrimination statute(s) which may apply to the application.
7. Will comply, or has already complied, with the requirements of Titles II and III of the Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970 (P.L. 91-646) which provide for fair and equitable treatment of persons displaced or whose property is acquired as a result of Federal or federally-assisted programs. These requirements apply to all interests in real property acquired for project purposes regardless of Federal participation in purchases.
8. Will comply, as applicable, with provisions of the Hatch Act (5 U.S.C. §§1501-1508 and 7324-7328) which limit the political activities of employees whose principal employment activities are funded in whole or in part with Federal funds.

9. Will comply, as applicable, with the provisions of the Davis-Bacon Act (40 U.S.C. §§276a to 276a-7), the Copeland Act (40 U.S.C. §276c and 18 U.S.C. §874), and the Contract Work Hours and Safety Standards Act (40 U.S.C. §§327- 333), regarding labor standards for federally-assisted construction subagreements.
10. Will comply, if applicable, with flood insurance purchase requirements of Section 102(a) of the Flood Disaster Protection Act of 1973 (P.L. 93-234) which requires recipients in a special flood hazard area to participate in the program and to purchase flood insurance if the total cost of insurable construction and acquisition is \$10,000 or more.
11. Will comply with environmental standards which may be prescribed pursuant to the following: (a) institution of environmental quality control measures under the National Environmental Policy Act of 1969 (P.L. 91-190) and Executive Order (EO) 11514; (b) notification of violating facilities pursuant to EO 11738; (c) protection of wetlands pursuant to EO 11990; (d) evaluation of flood hazards in floodplains in accordance with EO 11988; (e) assurance of project consistency with the approved State management program developed under the Coastal Zone Management Act of 1972 (16 U.S.C. §§1451 et seq.); (f) conformity of Federal actions to State (Clean Air) Implementation Plans under Section 176(c) of the Clean Air Act of 1955, as amended (42 U.S.C. §§7401 et seq.); (g) protection of underground sources of drinking water under the Safe Drinking Water Act of 1974, as amended (P.L. 93-523); and, (h) protection of endangered species under the Endangered Species Act of 1973, as amended (P.L. 93- 205).
12. Will comply with the Wild and Scenic Rivers Act of 1968 (16 U.S.C. §§1271 et seq.) related to protecting components or potential components of the national wild and scenic rivers system.
13. Will assist the awarding agency in assuring compliance with Section 106 of the National Historic Preservation Act of 1966, as amended (16 U.S.C. §470), EO 11593 (identification and protection of historic properties), and the Archaeological and Historic Preservation Act of 1974 (16 U.S.C. §§469a-1 et seq.).
14. Will comply with P.L. 93-348 regarding the protection of human subjects involved in research, development, and related activities supported by this award of assistance.
15. Will comply with the Laboratory Animal Welfare Act of 1966 (P.L. 89-544, as amended, 7 U.S.C. §§2131 et seq.) pertaining to the care, handling, and treatment of warm blooded animals held for research, teaching, or other activities supported by this award of assistance.
16. Will comply with the Lead-Based Paint Poisoning Prevention Act (42 U.S.C. §§4801 et seq.) which prohibits the use of lead-based paint in construction or rehabilitation of residence structures.
17. Will cause to be performed the required financial and compliance audits in accordance with the Single Audit Act Amendments of 1996 and OMB Circular No. A-133, "Audits of States, Local Governments, and Non-Profit Organizations."
18. Will comply with all applicable requirements of all other Federal laws, executive orders, regulations, and policies governing this program.
19. Will comply with the requirements of Section 106(g) of the Trafficking Victims Protection Act (TVPA) of 2000, as amended (22 U.S.C. 7104) which prohibits grant award recipients or a sub-recipient from (1) Engaging in severe forms of trafficking in persons during the period of time that the award is in effect (2) Procuring a commercial sex act during the period of time that the award is in effect or (3) Using forced labor in the performance of the award or subawards under the award.

Letter of Commitment

August 20, 2018

Mona-Lee Belizaire
Administration for Children and Families
Family and Youth Services Bureau
330 C Street SW
Washington, DC 20201

Re: Letter of Commitment to provide Sexual Risk Avoidance Education in Long Beach and Orange County, California

Dear Ms. Belizaire,

I would like to express my full support for The Obria Group, Inc. and Obria Medical Clinics application for the FY 18 Title V Competitive Sexual Risk Avoidance Education grant opportunity to implement several Sexual Risk Avoidance Education program services in California and Washington. The Obria Group is an umbrella organization for a national network of life-affirming community health care clinics doing business as Obria Medical Clinics. Currently, Obria affiliates are in California, Oregon, Washington, Iowa, and Georgia. Obria affiliates are committed to providing comprehensive life-affirming sexual and reproductive health care services, health education, and supportive services to all individuals seeking quality healthcare regardless of their ability to pay. For over 35 years, Obria has maintained its mission of providing high-quality, innovative, and holistic sexual and reproductive health care services that will contribute to a healthy community, focusing on those in need.

Obria Medical Clinics of Southern California is a 501 (c)(3) non-profit organization (EIN 33-0150193) that provides a wide array of sexual and reproductive health care services in Orange County and Long Beach California, and is currently an affiliate of The Obria Group, Inc, an umbrella organization for a national network of life-affirming community health care clinics.

In the event the proposed project is funded by the Families and Youth Services Bureau, Obria Medical Clinics of Southern California anticipates that we will be able to provide sexual risk avoidance education to youth at risk for poor sexual and reproductive health outcomes. Our organization commits to provide sexual risk avoidance education (Relationship Education and Leadership Essentials curriculum) in clinic settings, school districts and community organizations. My organization will provide approximately sexual risk avoidance education to 500 students.

I fully support the efforts of The Obria Group, Inc. and look forward to working with them in this important endeavor. We will work collaboratively with The Obria Group, Inc. to ensure our goals are aligned with the goals of the grant proposal, including efforts to track and report on outcomes. There are many health disparities that continue to exist in our community. The Obria Group, Inc.

and Obria affiliates are dedicated to address those disparities by providing improved access to comprehensive sexual and reproductive health care services and sexual risk avoidance education to those in need. We believe our involvement will significantly improve the availability and access to these important services in our service areas. If I may provide any additional information to you, please feel free to contact me at 949-916-0763 or cvenegas@omcsocal.org.

Sincerely,

(b)(6)

Clare Venegas
Interim Executive Director

Re: Letter of Commitment to provide Sexual Risk Avoidance Education in Orange County, California.

Dear Ms. Belizaire,

I would like to express my full support for The Obria Group, Inc. and Obria Medical Clinics application for the FY 18 Title V Competitive Sexual Risk Avoidance Education grant opportunity to implement several Sexual Risk Avoidance Education program services in California and Washington. The Obria Group is an umbrella organization for a national network of life-affirming community health care clinics doing business as Obria Medical Clinics. Currently, Obria affiliates are in California, Oregon, Washington, Iowa, and Georgia. Obria affiliates are committed to providing comprehensive life-affirming sexual and reproductive health care services, health education, and supportive services to all individuals seeking quality healthcare regardless of their ability to pay. For over 35 years, Obria has maintained its mission of providing high-quality, innovative, and holistic sexual and reproductive health care services that will contribute to a healthy community, focusing on those in need.

Beacon of Light is a 501 (c)(3) non-profit organization that provides education to teens regarding their sexual health: to guide them towards healthy decision-making based on the most current medical and scientific data, with the goal of preventing both the physical and emotional consequences of having sex at a young age. Beacon of Light provides a perspective not often heard through the media and popular society, but one that offers hope and support for making wise choices today, safeguarding their future.

In the event the proposed project is funded by the Families and Youth Services Bureau, Beacon of Light anticipates that we will be able to provide sexual risk avoidance education to youth at risk for poor sexual and reproductive health outcomes. Our organization commits to provide sexual risk avoidance education (Relationship Education and Leadership Essentials curriculum) in clinic settings, school districts and community organizations. My organization will provide approximately sexual risk avoidance education to 10,000 students.

I fully support the efforts of The Obria Group, Inc. and look forward to working with them in this important endeavor. We will work collaboratively with The Obria Group, Inc. to ensure our goals are aligned with the goals of the grant proposal, including efforts to track and report on outcomes. Re: Letter of Commitment to provide Sexual Risk Avoidance Education in Whittier and Pasadena, California

Dear Ms. Belizaire,

I would like to express my full support for The Obria Group, Inc. and Obria Medical Clinics application for the FY 1B Title V Competitive Sexual Risk Avoidance Education grant opportunity to implement several Sexual Risk Avoidance Education program services in California and Washington. The Obria Group is an umbrella organization for a national network of life-affirming community health care clinics doing business as Obria Medical Clinics. Currently, Obria affiliates are in California, Oregon, Washington, Iowa, and Georgia. Obria affiliates are committed to providing comprehensive life-affirming sexual and reproductive health care services, health education, and supportive services to all individuals seeking quality healthcare regardless of their ability to pay. For over 35 years, Obria has maintained its mission of providing high-quality, innovative, and holistic sexual and reproductive health care services that will contribute to a healthy community, focusing on those in need.

WPCC-Obria is a 501 (c)(3) non-profit organization that provides a wide array of sexual and reproductive health care services in Pasadena and Whittier including pregnancy confirmation, STD testing, STD risk avoidance education, fertility and parenting education. WPCC-Obria Clinics empower individuals to thrive through sexual health and pregnancy choices by addressing the physical, emotional and spiritual needs of those they serve with a three-fold approach of prevention, provision and partnership.

In the event the Families and Youth Services Bureau funds the proposed project, WPCC-Obria anticipates that we will be able to provide sexual risk avoidance education to youth at risk for poor sexual and reproductive health outcomes. Our organization commits to provide sexual risk avoidance education (Relationship Education and Leadership Essentials curriculum) in clinic settings, schools and community organizations. My organization will provide approximately sexual risk avoidance education to approximately 300 youths.

I fully support the efforts of The Obria Group, Inc. and look forward to working with them in this

Re: Letter of Commitment to provide Sexual Risk Avoidance Education in Washington State.

Dear Ms. Belizaire,

I would like to express my full support for The OBRIA Group, Inc. and OBRIA Medical Clinics application for the FY 18 Title V Competitive Sexual Risk Avoidance Education grant opportunity to implement several Sexual Risk Avoidance Education program services in California and Washington.

The OBRIA Group is an umbrella organization for a national network of life-affirming community health care clinics doing business as OBRIA Medical Clinics. Currently, OBRIA affiliates are in California, Oregon, Washington, Iowa, and Georgia. OBRIA affiliates are committed to providing comprehensive life-affirming sexual and reproductive health care services, health education, and supportive services to all individuals seeking quality healthcare regardless of their ability to pay.

My affiliate, known as OBRIA Medical Clinics PNW [OBRIA PNW] is a AAAHC (Accreditation Association for Ambulatory Health Care) medically accredited, 501 (c)(3) non-profit organization that provides a wide array of sexual and reproductive health care services in Western Washington and beyond. OBRIA PNW is committed to providing Sexual Risk Avoidance education (Relationship Education and Leadership Essentials curriculum) directly to the communities we serve.

We have developed an implementation plan, identifying clinic settings, school districts and community organizations in need of and receptive to this holistic, innovative and age-appropriate curriculum. Utilizing our established partners and contacts within the Pacific Northwest, *OBRIA PNW projects it will reach in excess of 50 Washington State school districts during the first year of placement of this curriculum.* This translates to more than 15% of the school districts within our state. In raw numbers, this outreach will include more than 300 individual 9th Grade students *within each of these districts, or over 15,000 youth.*

We exist to empower individuals to life-affirming choices.

Moreover, this projection does not include the significant number of Home-Schooled students that we are poised to reach through our relationships with their governing networks associations. Reflective of the growing trend nationally, home schooled students represent an ever expanding percentage of the students in our state of Washington.

In hopeful anticipation that this project is funded by the Families and Youth Services Bureau, OBRIA PNW is diligently refining its plan of implementation. We continue to develop and expand our community relationships, thereby expanding the number of youth we will reach with this much needed curriculum.

I fully support the efforts of The OBRIA Group, Inc. and look forward to working with them in this important endeavor. Our collaborative affiliation with The OBRIA Group, Inc. ensures our goals are aligned with those of this grant proposal, including efforts to track and report on outcomes.

There are many health care disparities that continue to exist in our community, and many are traceable to a lack of critical education in basic, holistic and innovative sexual risk aversion self-care. The OBRIA Group, Inc. and OBRIA affiliates are dedicated to addressing those disparities by providing meaningful access to comprehensive sexual and reproductive health care services and sexual risk avoidance education to those in need.

Because of our longstanding involvement in our communities, we are confident that this program, if funded, will significantly improve the access to these important services in our service areas, dramatically improving their quality of life.

If I may provide any additional information to you, please contact me at 360.(b)(6) or river@mychoices.org.

Sincerely,

(b)(6)

Re: Letter of Commitment to provide Sexual Risk Avoidance Education in Mountain View, Union City, East San Jose, and San Jose, California

Dear Ms. Belizaire,

I would like to express my full support for The Obria Group, Inc. and Obria Medical Clinics application for the FY 18 Title V Competitive Sexual Risk Avoidance Education grant opportunity to implement several Sexual Risk Avoidance Education program services in California and Washington. The Obria Group is an umbrella organization for a national network of life-affirming community health care clinics doing business as Obria Medical Clinics. Obria affiliates are currently located in California, Oregon, Washington, Iowa, and Georgia. Obria affiliates are committed to providing comprehensive, life-affirming sexual and reproductive health care services, health education, and support services to all individuals seeking quality healthcare regardless of their ability to pay. For over 35 years Obria has maintained its mission of providing high-quality, innovative, and holistic sexual and reproductive health care services that contribute to the health of many in our communities, focusing on those in need.

RealOptions Obria Medical Clinics is a 501 (c)(3) non-profit organization that provides a wide array of sexual and reproductive health care services and outreach programs in Mountain View, Union City, East San Jose, and central San Jose (covering communities in both East and South San Francisco Bay Areas). Recognized for our quality of care since 1981, our Outreach programs include: sexual risk avoidance education to local public and private schools and youth groups tailored to educate both parents and students; campus clubs on three university and two junior college campuses providing support and referrals into our clinics and other outreach programs; and post abortion support groups and retreats. Medical services include: pregnancy testing, ultrasound imaging, options consultations, STD Testing and treatment, prenatal care, abortion pill reversal treatment, childbirth and parenting classes, maternity and baby material support, adoption support, and referrals. RealOptions Obria Medical Clinics strives to be the first place people go to learn all their options when facing an unintended pregnancy or sexual health concerns. All medical services are confidential. We offer a broad spectrum of prevention, intervention, and wellness services to the community positively impacting thousands of students and families each year.

In the event the proposed project is funded by the Families and Youth Services Bureau, RealOptions Obria Medical Clinics anticipates that we will be able to provide sexual risk avoidance education to youth at risk for poor sexual and reproductive health outcomes. Our organization commits to provide sexual risk avoidance education (The Center for Relationship Education and Leadership Essentials curriculum) in clinic settings, school districts, and community organizations. My organization will provide sexual risk avoidance education to approximately 3400 students.

I fully support the efforts of The Obria Group, Inc. and look forward to working with them in this important endeavor. We will work collaboratively with The Obria Group, Inc. to ensure our goals are aligned with the goals of the grant proposal, including efforts to track and report on outcomes. There are many health disparities that continue to exist in our community. The Obria Group, Inc. and Obria affiliates are dedicated to address those disparities by providing improved access to comprehensive sexual and reproductive health care services and sexual risk avoidance education to those in need. We believe our involvement will significantly improve the availability and access to these important services in our service areas. If I may provide any additional information to you, please feel free to contact me at 408-229-9836 or via email at Valerie@realoptions.net.

Sincerely,

(b)(6)

Attn: Title V Sexual Risk Avoidance Education

Dear Ms. Belizaire,

I would like to express my full support for The Obria Group, Inc. application for the 2018 Title V Competitive Sexual Risk Avoidance Education grant opportunity. The Obria Group is an umbrella organization for a national network of life-affirming community health care clinics. Currently, affiliates are in California, Oregon, Washington, Iowa, and Georgia. Obria's affiliates are committed to providing comprehensive life-affirming health care services, health education, and supportive services to all individuals seeking quality healthcare regardless of their ability to pay. For over 35 years, Obria has maintained its mission of providing high-quality, innovative, and holistic life-affirming health care services that will contribute to a healthy community, focusing on those in need.

Salus Animarum

As the Pastor, at Blessed John Henry Newman Catholic Church, I understand the critical need to improve access to Sexual Risk Avoidance Education and comprehensive life-affirming health care services in low-income and underserved communities. The Obria Group, Inc. is a well-recognized national organization because it provides care for the most underserved and at-risk children, adolescents, and adults. Obria's network of community health centers plays a vital role in the country by providing access to high-quality life-affirming health care services and health promotion. Some of Obria's services include pregnancy testing, STD testing and treatment, STD risk avoidance education, HIV testing, well-woman care, breast and cervical cancer screening, contraceptives education, fertility education, parenting education, sexual risk avoidance education and prenatal care among others.

Dear Ms. Belizaire,

As a licensed surgeon in the state of Washington for 31 years, I know the value of high standards in medical practice. Having accreditation through AAAHC, Obria Medical Clinics PNW bring valuable services at a high standard of care into the communities they serve.

I am pleased to support the Obria Group Inc. in their application for the FY 18 Sexual Risk Avoidance Education funding. The evidence based, age appropriate, medically cited curriculum is necessary to support the youth in our communities in their growth to healthy mature effective adults.

Since 1984 Obria Medical Clinics PNW has served the low income and underserved members of the North Olympic Peninsula in Washington State. With the addition of their mobile medical center in 2016, they began taking their services to additional underserved communities of Western Washington. The services they provide are essential in building strong families.

I fully support the efforts of Obria PNW and Obria Group in their affiliation partnership as they work to bring these important comprehensive health care services and sexual risk avoidance education to the communities they serve. You may contact me for further information.

Sincerely,

(b)(6)

ATTN: Title V Sexual Risk Avoidance Education

Dear Ms. Belizaire,

I would like to express my full support for the application by the Obria Group, Inc for this grant. Receiving this grant would be extremely timely as the local school boards in both the Sequim and Port Angeles School Districts are currently re-visiting their decisions on what programs to adopt re: sexual and health education to fulfill the Washington state mandates that were passed recently. Their decision to re-address this issue was the direct result of significant community criticism over the programs that were initially adopted. Thus, receipt of this grant will greatly improve the resources available to Obria Medical Clinics PNW to present life-affirming health information for the schools to use or from which to draw in providing sexual and health education.

As a retired physician, who practiced in this community for 17 years, I am well aware of the multiple societal problems that plague this community, many of which are related to unhealthy sexual practices and the associated collapse of families. Thus, access to the Sexual Risk Avoidance Education program will help to fill this critical need.

I am thankful for groups such as Obria Medical Clinics PNW and their parent organization, The Obria Group, Inc, as they work to affirm life, promote healthy families and provide direct medical, social support and educational services to persons in crisis and need, going against the direction that our current society has taken.

Please feel free to contact me if you wish additional information in support of this grant application. (b)(6)@gmail.com; (b)(6).

Sincerely,

(b)(6)

Attn: Title V Sexual Risk Avoidance Education

Dear Ms. Belizaire,

My name is (b)(6) and I'm the parent of a high school senior who graduated from the King's Academy in May 2018. I'm also a retired Engineering Manager who's actively engaged with the youth in our community, and I've been substitute teaching at The King's Academy since I retired in 2012. I believe life is precious and is a gift from God so I strongly support the mission and purpose of RealOptions Obria Medical Clinics, including encouraging life-affirming choices that advance a culture of life and providing the support structures in our community that facilitate compassionate medical services to women facing pregnancy decisions; parenting and adoption support services, and abstinence prevention education with engaging interactive presentations to students on school campuses.

As the father of a teenage son, I realize I can have significant influence in my son's decisions about sex, and recognize that teenagers who have relevant and informed conversations with their parents are more likely to delay sexual activity and pursue abstinence. As parents, we need to be educated to help prepare our youth to understand their sexuality starting when they are young by providing them with guidance and support throughout their teenage years. Helping them deal with their sexuality involves a wide range of topics, including the differences in male and female bodies and how they function, human development, sexual reproduction, healthy or unhealthy relationships, and how to prevent pregnancy and STDs through sexual abstinence.

I'm a passionate supporter of the value and impact of RealOption Obria Medical Clinics' RealTalk. RealTalk provides an educational platform and programming for youth and concerned parents to aid in the prevention of unplanned pregnancies, STD's, and avert emotional suffering during the vulnerable teenage years. Through the messaging and resources of RealTalk, parents can also prudently inform and equip themselves to reinforce these messages, encouraging teenagers to practice abstinence and risk avoidance by setting clear expectations and boundaries for their relationships. RealTalk provides relevant and proven ways that we in our communities and schools can help prevent teen pregnancy, the spread of STDs, and help ensure our youth that they live the best lives possible.

I have classroom experience and personally witnessed the effectiveness of RealTalk's curriculum and exercises in my classroom. I've also interceded with the school leadership and staff to promote the necessity for RealTalk's presentation to the wider student body. The Kings Academy has a diverse ethnic, racial, and religious coed student population which is reflective of our local area and its students are exposed to the same cultural pressures and values as their peers in the surrounding community. Sexual activity and teen pregnancy are unfortunate realities in the student body, so I'm a strong proponent of providing students with information about the risks and impacts of sexual behavior. RealTalk's program and initiatives address that imperative and are effectively responding to the challenge of encouraging students to avoid risky behavior, while promoting sexual abstinence in an engaging and proven manner. If I may provide any additional information to you, please feel free to contact me at (b)(6)

Sincerely,

(b)(6)

Dear Ms. Belizaire:

I would like to express my support for The Obria Group, Inc. application for the Title V Sexual Risk Avoidance Education Program grant opportunity. The Obria Group is an umbrella organization for a national network of life-affirming community health care clinics. Currently, affiliates are in California, Oregon, Washington, Iowa, and Georgia. Obria's affiliates are committed to providing comprehensive life-affirming health care services, health education, and supportive services to all individuals seeking quality healthcare regardless of their ability to pay. For over 35 years, Obria has maintained its mission of providing high-quality, innovative, and holistic life-affirming health care services that will contribute to a healthy community, focusing on those in need.

There are 102 parishes and 43 schools in the Diocese of Sacramento. We provide religious instruction to children and young people, who attend local public schools, in an array of after-school programs. The Diocese of Sacramento also manages Catholic centers for university students at two California State Universities and one University of California campus. A significant portion of the children and young people we serve live in low-income, at-risk communities. The parish and school facilities are safe oasis where they can learn and grow.

I understand the critical need to improve access to Sexual Risk Avoidance Education and comprehensive life-affirming health care services in low-income and underserved communities. The Obria Group, Inc. is a well-recognized national organization because it provides care for the most underserved and at-risk children, adolescents, and adults. Obria's network of community health centers plays a vital role in the country by providing access to high-quality life-affirming health care services and health promotion. Some of Obria's services include pregnancy testing, STD testing and treatment, STD risk avoidance education, HIV testing, well-woman care, breast and cervical cancer screening, contraceptives education, fertility education, parenting education, sexual risk avoidance education and prenatal care among others.

I have worked with the Obria Group, Inc. for almost twenty years. I look forward to working with them in this important endeavor. There are many health disparities that continue to exist in our nation. Obria is dedicated to address those disparities by providing improved access to comprehensive life-affirming health care services and sexual risk avoidance education to those in need. If I may provide any additional information to you, please feel free to contact me at 916-733-0203.

Respectfully,

(b)(6)

Form 990 required: Yes

Dear Taxpayer:

This is in response to your request dated Jan. 26, 2017, regarding your tax-exempt status.

We issued you a determination letter in October 2005, recognizing you as tax-exempt under Internal Revenue Code (IRC) Section 501(c)(03).

Our records also indicate you're not a private foundation as defined under IRC Section 509(a) because you're described in IRC Sections 509(a)(1) and 170(b)(1)(A)(vi).

Donors can deduct contributions they make to you as provided in IRC Section 170. You're also qualified to receive tax deductible bequests, legacies, devises, transfers, or gifts under IRC Sections 2055, 2106, and 2522.

In the heading of this letter, we indicated whether you must file an annual information return. If a return is required, you must file Form 990, 990-EZ, 990-N, or 990-PF by the 15th day of the fifth month after the end of your annual accounting period. IRC Section 6033(j) provides that, if you don't file a required annual information return or notice for three consecutive years, your exempt status will be automatically revoked on the filing due date of the third required return or notice.

For tax forms, instructions, and publications, visit www.irs.gov or call 1-800-TAX-FORM (1-800-829-3676).

If you have questions, call 1-877-829-5500 between 8 a.m. and 5 p.m., local time, Monday through Friday (Alaska and Hawaii follow Pacific Time).

1. Project Summary/Abstract

Project Title: Improving Sexual and Reproductive Health Outcomes for At-Risk Youth.

Applicant Name: The Obria Group, Inc.

Address: 17731 Irvine Blvd., Ste. 201-B, Tustin, CA 92780

Contact Phone Numbers (Voice, Fax): 949-273-5040

E-Mail Address: info@obria.org

Web Site Address: www.obria.org

The Obria Group, Inc. is the umbrella organization under which a national network of life-affirming sexual and reproductive health care clinics operates under the brand name Obria Medical Clinics. The Obria Group, Inc. seeks to do the following: (1) reduce the barriers to life-affirming sexual and reproductive health care and health education; (2) replicate comprehensive life-affirming sexual and reproductive health care clinics under an affiliation program across the nation; and (3) support and guide Obria affiliates to provide affordable access to life-affirming sexual and reproductive health care services and health education to low-income individuals who are at high-risk for poor health outcomes. The Obria Group, Inc. and Obria Medical Clinic affiliates provide the best care, both in terms of treatment and patient experience. Obria's staff respects the rights of patients and want them to understand their responsibility as a partner in their care. Obria's staff strives to provide accurate information to patients about their health care in an environment that maintains dignity and respect.

The Obria Group, Inc. seeks to implement the *Improving Sexual and Reproductive Health Outcomes for At-Risk Youth* at each Obria Medical Clinics affiliate service area in California and Washington. The goal of the program is to reduce teen pregnancy and sexually transmitted infections (STIs) by implementing a comprehensive approach to adolescent wellbeing that includes the development of healthy relationships. The program will be administered by The Obria Group, Inc. and implemented by Obria Medical Clinic affiliates and Beacon of Light (sub-grantees) in several locations in California and Washington. Obria Medical Clinic affiliate locations and Beacon of Light will target vulnerable youth populations as follows: youth living in under resourced regions and areas with high rates of teen births and STIs, culturally underrepresented youth populations, especially Hispanic, African American, or Native American teenagers, youth in or aging out of foster care or adjudication systems, youth who are victims of trafficking, runaway and homeless youth, and other vulnerable youth populations.

The Obria Group, Inc., Obria Medical Clinics affiliates and Beacon of Light (contractors) will use The Center for Relationship Education's REAL (Relationship Education and Leadership) Essentials curriculums, including REAL Essentials Starting Point (4th-8th grades), Advance (9th-12th grades), and Health (9th grade to adult). The lessons are age-appropriate, and science based. The concepts are clear and concrete, aligning with the development of the teen brain. The Relationship Coaching sessions in the clinical setting will utilize the REAL Essentials Health curriculum. It addresses a variety of science -based components for life and love skills adolescents and adults.

A Program Director and Health Education Manager will oversee the implementation of the program and monitor the sub-grantees through site visits, performance and financial reporting, and will also provide training, technical assistance, and evaluation information to grantees.

2. Objectives and Need for Assistance

The Obria Group, Inc. and Obria affiliates' target population often experiences significant disparities accessing care, quality education, and other important resources, which are necessary to break the cycle of poverty. As such, they experience lower life expectancy, higher infant mortality, and a higher likelihood of experiencing chronic and communicable diseases and lower quality care. For these reasons, Obria is strongly committed to provide affordable and accessible quality care, health education (primary prevention) and support services to vulnerable and low-income women, men and adolescents to enable them to become self-sufficient, break the cycle of poverty, and improve their overall wellbeing. Obria has a strong commitment to address the social determinants of health (education, income, poverty, unemployment, race/ethnicity, etc.) and improve the safety net for vulnerable families and individuals.

Obria's service areas experience similar challenges accessing quality sexual and reproductive health care and health education which have serious negative consequences, as follows:

- a) Lack of health insurance, which is a significant barrier to access culturally and linguistically appropriate quality care;¹
- b) Lack of providers who speak languages other than English or who accept Medicaid;²
- c) Lack of access to sex education, especially for the adolescent population, which results in a disproportionate rate of teen pregnancy and 89% of all teen births are to unmarried parents.

Teen pregnancy is linked to low birth weight and infant mortality;³

- d) Higher proportion of expectant mothers who have later or no prenatal care, especially in communities of color;
- e) Because of substance abuse by pregnant women, babies are at risk for developmental, physical, behavioral and social disabilities;
- f) The most recent data reports that about 30% of pregnancies among 15-19-year old end in abortion, down from 46% in 1986.⁴
- g) Although nearly all (99%) sexually experienced teen women have used some form of contraception,⁵ STDs continue to be at epidemic levels among youth. Sexually transmitted diseases have increased its incidence. Sadly, women are more impacted and bear the burden of most of the negative consequences from STDs.⁶ Also, among communities of color, lack of access to preventive screening and treatment has led to disparities in this health need;
- h) Young adults (age 15-24) contract about 10 million new STDs each year, costing about \$8 billion in direct medical costs.⁷
- i) About 40% of sexually active teen girls (aged 14-19) have at least one STD.⁸
- j) Half of all new STDs are found among youth, aged 15-24, although they only represent 1/4 of the sexually experienced population.⁹

⁹ CDC. Sexually Transmitted Diseases: Adolescents and Young Adults. 2018. cdc.gov/std/life-stages-populations/adolescents-youngadults.htm

- k) More sexually active high schoolers are using long-acting reversible contraception (LARC), but are failing to use a condom as well, to offer STD risk reduction;¹⁰
- l) The four most common STDs among teen girls are (in order): HPV, chlamydia, trichomoniasis, herpes, and gonorrhea.¹¹ Herpes and HPV can be easily transmitted even with the use of a condom because they can be spread by skin-to-skin contact. About 40% of sexually active teen girls (aged 14-19) have at least one STD.¹²
- m) Young adults (15-24) account for nearly 2/3 of all reported cases of chlamydia and gonorrhea.¹³
- n) Gonorrhea is considered an urgent threat because it is showing resistance to the last line of antibiotics usually used to treat it.¹⁴
- o) Although most teens are not sexually active, those who are, are at great risk for contracting or transmitting an STD.¹⁵

Obria is committed to improving access to affordable and timely access to high quality health care services, health education (primary prevention) and supportive services for low-income and medically disenfranchised women, men and adolescents in a cost-effective and appropriate manner. Obria identifies community needs and develops strategies that are responsive to patients'

needs and represent dramatic reductions in costs and waiting times. Obria serves low-income communities in several locations in California and Washington, as follows:

California:

Obria Medical Clinics of Southern California, Inc. (OMC SoCal) is a 501(c)(3) nonprofit, fully-licensed and AAAHC accredited network of four community health care clinics in Southern California with clinic locations in Orange, Long Beach, Mission Viejo and a Mobile Clinic. OMC SoCal's three fixed clinic locations and a state-of-the-art mobile clinic play a vital role in the most underserved communities in Southern California. In 2017, OMC SoCal served 2,355 patients

through 3,731 medical visits. Of those seen, 86% were below 200% of the federal poverty line; 75% were female; 41.4% were between the ages of 15-24; 41.4% were Hispanic; 26.1 were Caucasian; 12.4% were African American; and 11% were Asian.

Obria Medical Clinics – WPCC is a 501(c)(3) non-profit, fully-licensed community health care clinic with locations in Whittier and Pasadena, CA. Obria-WPCC has impacted the lives of more than 10,000 vulnerable, uninsured and low-income young people, mostly ages 14-25. Obria-WPCC’s two brick-and-mortar clinic locations play a vital role in some of the most underserved and vulnerable communities in Los Angeles County: Whittier and Pasadena. Every year, Obria-WPCC provides more than 600 medical and support services to approximately 400 unique patients. Of those seen, approximately 99% were below 200% of the federal poverty line.

In addition, according to the Los Angeles Department of Health, the incidence of all STDs (HIV, Syphilis, Gonorrhea and Chlamydia) in Los Angeles is higher than state and national rates.²³ Los Angeles County experienced sharper increases in gonorrhea and congenital syphilis cases than the State. Chlamydia remains the most common reportable disease in California; it's at its highest level since mandated reporting began in 1990.

The highest rates of chlamydia are among young women.²⁴ The L.A. County Public Health Department says that one reason for the increase in STDs is because more young women are using long-acting

3. Expected Outcomes

The ultimate goal of Obria's Sexual Risk Avoidance Education Program is to eliminate all risks associated with sexual behavior and help men, women and adolescents achieve optimal health outcomes. Obria's strategy is to use primary prevention education aimed to teach youth and young adults how to voluntarily abstain from non-marital sexual activity and other risky behaviors. The project has four main expected outcomes associated with its implementation, as follows:

- 1) Delay sexual initiation among youth;
- 2) Decrease rates of sexual activity among sexually active individuals.
- 3) Decrease teen pregnancy rates; and
- 4) Decrease STIs rates.

Obria's Sexual Risk Avoidance Education Program SMART Goals are as follows:

- By the end of Year 1, Obria affiliates in California and Washington will have trained and certified at least 2 facilitators per Obria affiliate location to implement at least 6-8 hours of instruction to school-aged students in school or community settings, as measured by Obria's Project Review Tool.
- By the end of Year 1, Obria affiliates California and Washington will have trained and certified at least 2 health professionals per Obria affiliate to provide Sexual Risk Avoidance Education to all patients in clinic settings, as measured by Obria's Project Review Tool.
- By the end of Year 1, at least 2 health education personnel per Obria affiliate in California and Washington will have an increased awareness and understanding of optimal wellness and relationship education programming. Obria affiliates California and Washington will host 12 Meet and Greet events reaching out to youth serving agency personnel, educational and community

leaders to foster understanding and build partnerships with other community organizations regarding the primary prevention and sexual health initiative across Obria serving sites. It will be measured by Obria's Project Review Tool.

- By the end of Year 1, students who receive at least 6 or 8 hours of program activities will demonstrate increased relationship development skills, change in attitude regarding impulse control and self-regulation, committed love and marriage, the importance of life planning and future orientation and articulate an intention to delay sexual activity demonstrated by movement on a 5-point Likert scale on pre- and post-surveys.
- By the end of Year 1, teen pregnancy will be down by at least 2% in the counties that Obria Medical Clinics serve based on baseline data prior to intervention and or programming.
- By the end of Year 1, STIs rates will be down by at least 2% in the counties that Obria Medical Clinics serve based on baseline data prior to intervention and or programming.
- By the end of Year 1, at least 15,000 Obria's sexually active patients will articulate that they are ready and have the skills necessary to stop engaging in sexual activity, as measured by patient satisfaction survey.

4. Approach

The Obria Group, Inc. is a 501(c)3 nonprofit based in Southern California operating under the leadership of Kathleen Eaton Bravo. Kathleen is the founder and CEO of several healthcare initiatives including The Obria Group, Inc. and Obria Medical Clinics of Southern California. Kathleen established Obria Medical Clinics in 1981, one of the largest networks of sexual and reproductive health care clinics in Southern California.

The Obria Group Inc. an umbrella organization under which a network of life-affirming sexual and reproductive health care clinics operates throughout the nation under the brand name Obria Medical Clinics. The Group seeks to do the following: (1) reduce the barriers to sexual and reproductive health care via strategically located brick-and-mortar clinics, telemedicine services and mobile clinics; (2) replicate comprehensive sexual and reproductive health care clinics under an affiliation program across the nation; and (3) support and guide Obria affiliates to provide affordable access to sexual and reproductive health care services to low-income individuals who are at high-risk for poor health outcomes.

Since 1981, Obria has worked to strengthen low-income individuals and families to choose healthy lifestyles and become healthier and self-sufficient. Obria is committed to serving women and men in crisis through empowerment and education and fostering hope in situations that feel overwhelmingly hopeless. Obria understands the critical need for high-quality and cost-effective life-affirming sexual and reproductive health services.

Obria's diverse, compassionate and multidisciplinary team of professionals meet people where they are, without judgment, and provide them with the support and information they need in a culturally and linguistically appropriate manner. As a result, Obria's patients are better equipped to choose a better future for themselves and their families.

Through strong collaborations and support from a wide array of agencies and churches in the local communities, Obria's programs improve parent resilience and their ability to address challenges by involving parents and family members as supportive family leaders; increase the knowledge of parenting and child development; build social connections that help youth, parents and immigrants build networks of support; identify victims of human trafficking and sexual abuse; and, provide concrete support and services in times of need.

Most importantly, Obria promotes and designs programs that develop relationships with low-income individuals to help them participate in decisions that positively affect their lives, families and communities. All Obria programs and services were created as a response to a community need. Obria has a Patient Advisory Board which was specifically organized to easily identify low-income leaders and engage them in the decision-making process of the organization.

- **Outline a plan of action that describes the scope and detail of how the proposed project will be accomplished. Applicants must account for all functions or activities identified in the application. Describe any design or technological innovations, reductions in cost or time, or extraordinary social and/or community involvement in the project.**

To effectively address the increased need for life affirming sexual and reproductive health care services, health education and supportive services, The Obria Group, Inc. and its network of affiliate clinics in California and Washington propose to implement its Sexual Risk Avoidance Education Program (SRAE) at 13 Obria Medical Clinics' service areas across the state of California and Washington. The overall goal of the Obria SRAE program is to help Obria's patients build healthy life skills and protective factors that mitigate the impact of past and future negative factors, empower participants to make healthy decisions, provide tools and resources to prevent pregnancy and STIs, and prevent youth engagement in other risky behaviors.

Obria proposes to implement its SRAE program in different settings, including clinic, telehealth (online), schools, and community organizations such as churches, family resource centers and others. Obria's interdisciplinary team of medical and educational professionals, such as OB/GYNs, nurse practitioners, physician assistants, health educators and registered nurses at each Obria clinic location, will provide both 1) neutral, factual information, culturally appropriate and

age-appropriate education to patients, and 2) assessment, screening, education and treatment; referrals and follow-up of such services. Any referrals will be based on the provider's documented assessment of the patient, indicating the medical necessity for referral(s) to other health-related or community support service. Obria's medical and educational professional won't promote, normalize or encourage sexual activity outside of marriage. They will also avoid creating any unintended consequences for youth that had already engaged in sexual activity.

All Beacon of Light and Obria Medical Clinics affiliates in California and Washington (13 locations) will utilize The Center for Relationship Education REAL (Relationship Education and Leadership) Essentials curriculum to meet the needs of youth through telehealth online visits, presentations and one-to-one meetings called "Relationship Coaching," for parents, youth, and young adults. Each counseling session will impart age-appropriate information and skills to equip families with the techniques that encourage family participation in decision making towards sexual risk avoidance and healthy relationship education as part of Obria's sexual and reproductive health care services. Each presentation will be provided to schools, colleges, community groups, churches, and in the Obria clinic locations. All services will be voluntary and free from coercion.

All curriculum lessons and one-on-one coaching sessions are age-appropriate, and medically accurate. The concepts are clear and concrete, aligning with the development of the teen brain.

Starting Point 4th-8th grade	REAL Essentials Advance 8-12th grade	REAL Essentials Life for Young Adults	Real Essentials Health
Learning about yourself and others	Learning about yourself and others	Self-discovery	REAL Essentials
Healthy friendship development	Navigating differences	Skills for communication and decision making	Health helps connect a client's sexual behavior patterns with the condition of his or her heart. It
Understanding cultural influences	Effective communication strategies	Safe dating strategies	
	Friendship, dating, and love	Consent	
		Steps of intimacy	

Skills for communication and decision making	Understanding cultural influences	Love Commitment and Marriage	expands the dialogue to supplement the medical information
Goal setting for the future	Planning for the future	Family formation	with healthy relationship skills. A valuable tool that
Puberty science	Commitment	Future vision and planning	provides medical professionals with a strategic and
Manners and etiquette	Success sequence		situationally appropriate plan for directing young
Grooming	Conflict resolution		women and men toward optimal sexual health.
Character development	Decision Making		
	Overcoming obstacles		
	Leadership and job readiness		
	Health benefits of marriage		
	Sexual health		

The Relationship Coaching sessions in the clinical setting will utilize the REAL Essentials Health curriculum. It addresses a variety of science-based components for life and love skills adolescents and adults. The program utilizes the Transtheoretical model of behavior change theory. Designed for medical centers and health clinics it captivates and engages clients with issues of the heart imparting the skills for healthy romantic and family attachments. During the Coaching sessions with trained and certified facilitators would work with clients to design a plan of action to increase their physical, intellectual, emotional, social and financial health also helping them get connected to social supports and additional services as needed.

One-to-one Relationship Coaching will be provided to parents as well as with their children. Equipping parents with science-based and practical tools to increase the health, safety, and well-being of their child/children is of paramount importance. They will also be encouraged cared for and supported through these coaching sessions on an ongoing basis. Through this program, Obria

will encourage family participation in the decision of minors to seek Obria life-affirming sexual and reproductive services and provide counseling to minors on how to resist attempts to coerce minors into engaging in sexual activities. If clients require additional support, mental health or legal services for sexual exploitation or coercion, or intimate partner violence referrals will be made.

Obria will use its telehealth platform: Obria Care telehealth app to provide coaching sessions to at-risk youth. The Obria Care telehealth app will help Obria medical and educational providers eliminate barriers to life-affirming health education and promotion by reaching young millennials searching for sexually related health care information on their Smartphones. Through our Obria Telemedicine clinic and its text and video chat capabilities, Obria can have a nurse or health educator right there with them, in any location, and move them away from sexual risks as their only option in life, to an option of self-control. Obria will implement and manage a telehealth platform to influence the decision cycle of at-risk individuals and increase patient traffic coming into Obria Medical Clinics across California and Washington. The overarching goal of the Obria's telehealth platform is twofold: (1) eliminate barriers to life-affirming health care, and (2) intersect with the decision cycle of at risk individuals at every identifiable stage of risk.

Provide a list of organizations, cooperating entities, consultants, or other key individuals that will work on the project, along with a short description of the nature of their effort or contribution.

The Obria Group, Inc, emphasize collaborative approaches to address social determinants of health, improve healthcare delivery, produce systemic changes to break the cycle of poverty, and strengthen families, individuals, and communities. The Obria Group, Inc. in partnership with Obria affiliates and Beacon of Light will implement Obria's Sexual Risk Avoidance Education Program as described in this grant proposal in California and Washington. The Obria Group, Inc. will apply

to the Health and Human Services Department as the main recipient and Beacon of Light and Obria affiliates across the California and Washington will join as subrecipients of the grant. The Obria Group, Inc. will provide grant management, implement Obria's Health Review Tool, perform quality control and compliance, provide new policies and procedures, manage marketing strategy, and organize the training of medical and health education professionals (health education by Center for Relationship Education curriculum). Each Obria affiliate will implement sexual risk avoidance education services and provide clinical, health education and supporting services to patients. Obria affiliates will be grant subrecipients. The Obria Group, Inc. selected the Obria affiliates listed below because they are committing themselves to implement the full scope of sexual risk avoidance education services described in this grant proposal. Organizations participating as grant subrecipients will be the following:

Affiliate	State	Locations	Contribution
Obria – Pacific Northwest	WA	3 health clinic sites and a mobile unit	Implement REAL Essentials curriculum in school, online (telehealth) community and clinic settings to all at-risk men, women and adolescents age 11-19.
Obria – Real Options	CA	4 health clinic sites	Implement REAL Essentials curriculum in school, online (telehealth) community and clinic settings to all at-risk men, women and adolescents age 11-19.
Obria – WPCC	CA	2 health clinic sites	Implement REAL Essentials curriculum online (telehealth) community and clinic settings to all at-risk men, women and adolescents age 11-19.
Obria SoCal	CA	3 health clinics and a mobile unit	Implement REAL Essentials curriculum online (telehealth) community and clinic settings to all at-risk men, women and adolescents age 11-19.
Beacon of Light	CA	1 location serving school several high school districts in Orange County.	Implement REAL Essentials curriculum in community and school settings to all at-risk adolescents age 11-19.

Cite potential obstacles and challenges to accomplishing project goals and explain strategies that will be used to address these challenges.

The most difficult challenge to accomplish Obria's project goals and objectives in school settings is misinformation. The general population has a limited understanding of sexual risk avoidance education approaches which impairs the ability of Obria Medical Clinic affiliates to provide health education (SRAE) services to public schools. In most cases, parents and school administrators agreed with the sexual risk avoidance education approach but lack the capacity to adequately assist school boards to approve the implementation of SRAE curriculums in school settings. The Obria Group, Inc. endorses the sexual risk avoidance education approach because is more effective than sexual risk reduction (SRE) strategies. SRAE is a public health model based on primary prevention, which seeks to eliminate all risks as opposed to simply reducing risks. For these reasons, The Obria Group, Inc. will implement the following activities to address this challenge:

- The Obria Group, Inc. will encourage all Obria Medical Clinic affiliates and contractors to educate their patients, schools, health care providers, government service agencies and youth services agencies about the differences between sexual risk avoidance education and sexual risk reduction approaches.
- The Obria Group, Inc. will educate all Obria Medical Clinic affiliates and contractors about the differences between sexual risk avoidance education and sexual risk reduction approaches.
- All Obria Medical Clinics and contractor's employees will be trained to have a good understanding of the differences between sexual risk avoidance education and sexual risk reduction education. Obria Medical Clinics employees will be able to understand and provide scientific evidence to support SRAE approaches.

- All Obria Medical Clinics and contractor's employees will have the skills and knowledge to advocate and educate patients, community members and other stakeholders about the differences between sexual risk avoidance education and sexual risk reduction.
- The Obria Group, Inc. will create marketing materials to effectively educate the community at large.
- The Obria Group, Inc, will seek a strategic partnership with Ascend to certify key personnel in SRAE. Ascend is one of the leading SRAE training providers in the U.S. Ascend works with SRAS educators, community organizations and more as they educate youth using a primary prevention health model.

Describe how the project will educate youth on how to refrain from non-marital sexual activity and prevent other youth risk behaviors. In addition, describe how the program incorporates a positive youth development approach that includes risk and protective factors in young people's lives that are known to influence sexual activity and other risk behaviors.

Obria Medical Clinics affiliates and contractors will encourage family participation in the decision of minors to seek Obria health education services and provide counseling to minors on how to resist attempts to coerce minors into engaging in sexual activities. Obria Medical Clinics will seek collaborations and support from a wide array of agencies and churches in the local communities to build protective factors in young people's lives. Obria's programs are specifically designed to improve patient's resilience and their ability to address challenges by involving parents and family members as supportive family leaders; increase the knowledge of parenting and child development; build social connections that help youth, parents and immigrants build networks of support; identify victims of human trafficking and sexual abuse; and, provide concrete support and

services in times of need. In addition, the REAL Essentials curriculum meets several SMARTool Targets regarding youth development, as follows:

SMARTool Targets	REAL Essentials Advance Alignment
1) Enhance knowledge of a) physical development and sexual risks and b) personal relationships.	The program teaches effective communication and conflict resolution skills as well as the prevention of assault, coercion, and intimate partner violence. REAL Essentials also directs students regarding consent laws and boundary setting.
2) Support personal attitudes and beliefs that value sexual risk avoidance.	REAL Essentials lessons help students explore their attitudes, beliefs and values in a safe, affirming climate of learning and discovery. Lessons outline and highlight the value of delaying sexual activity as an optimal strategy for adolescents to achieve health and future life success.
3) Acknowledge and address common rationalizations for sexual activity.	REAL Essentials includes topics regarding self-discovery, self-esteem and self-efficacy. This curriculum outlines a framework for a fresh start for students who want to apply the relationship education skills they acquire through the program.
4) Improve perception of and independence from negative peer and social norms.	REAL Essentials lessons equip adolescents to have discussions with peers about sex being more than a physical act and effecting whole person health. REAL Essential lessons help students improve their awareness of positive and negative peer pressure, including media depictions of high-risk behavior.
5) Build personal competencies and self-efficacy to avoid sexual activity.	REAL Essentials curriculum helps students recognize their personal worth, their gifts and talents, and their passion and purpose, thus improving critical thinking, communication, conflict resolution, and refusal skills. Elements of the REAL Essentials lessons include building social, emotional, and cognitive competence. The ability to establish and maintain personal boundaries is part of the competency to avoid sexual

	activity, whether that means resisting sexual coercion or avoiding sexually charged situations.
6) Strengthen personal intention and commitment to avoid sexual activity.	REAL Essentials lessons help students learn the skills to make their behavioral intentions clear and concrete to others. REAL Essentials explores what it means to be committed to something. Those commitments of healthy decision-making and self-regulation are strengthened as the curriculum explores a personal understanding of the risks of teen sex and delaying sexual activities.
7) Identify and reduce the opportunities for sexual activity	REAL Essentials lessons acknowledge the role of high risk situations that place teens in vulnerable situations, identifies these situations, promotes insights for students, and addresses how to mitigate these factors. Teens who have been sexually active then become more aware of vulnerable situations and develop personal strategies to avoid these opportunities. REAL Essentials utilizes “Connect at Home” lessons throughout the curriculum to engage parents and trusted adults. Building parental support, engaging adolescents in the community, and the availability of shared and safe activities are important protective factors.
8) Strengthen future goals and opportunities	REAL Essentials targets future goals and opportunities throughout the curriculum. The “success sequence” is highlighted as an important part of sexual risk avoidance. This sequence provides a protective factor against poverty, noting that if students 1) graduate from high school; 2) maintain a full-time job; and 3) marry before having children, they will have less than a 2% chance of ending up in poverty. Creating a new life script for high risk youth who have experienced generational poverty is a strategy to break this cycle.
9) Partner with parents	Research reveals that parents are more likely to talk to their children about sex and about delaying sexual activity when provided with direction and information. REAL Essentials has many lessons that have

	<p>a “Connect at Home” component, involving parents in the dialogue.</p> <p>REAL Essentials programming has a robust parent outreach and educational component to foster parent/child support and education.</p>
--	--

Describe how interventions will address the trauma needs of vulnerable youth and will ensure all curricula, services, and materials are medically accurate, age appropriate, and voluntary.

The Adverse Childhood Experiences Study⁴¹ has shown that experiencing trauma, especially during childhood, significantly increases the risk of serious health problems— including chronic diseases as well as depression, sexually transmitted diseases, tobacco, alcohol, and illicit drug abuse— throughout life.⁴² For this reason, The Obria Group, Inc. and Obria Medical Clinic affiliates will implement the best practices in Trauma Informed Care to improve health outcomes in its patient population. The Obria Group, Inc. and Obria affiliates will address the trauma needs of the vulnerable youth by implementing the following best practices in Trauma Informed Care:

- Become aware of the widespread impact of trauma;
- Implement policies and procedures that effectively address trauma;
- Train staff to recognize the signs and symptoms of trauma in patients;
- Train staff to avoid or resist re-traumatization of patients;
- Implement referral process for appropriate behavioral care options for patients;

⁴¹ <https://www.cdc.gov/violenceprevention/acestudy/about.html>

⁴² Key Ingredients for Successful Trauma-Informed Care Implementation. Retrieved from: http://www.chcs.org/media/ATC_whitepaper_040616.pdf

The Obria Group, Inc. will also establish and maintain Information & Education Committees (I & E committees) made up of local members. All medical policies and procedures and educational information will be approved by Obria's I & E committee prior to use by clinic and health education personnel. The committee will assure that materials provided to clients within the Health Education Program are:

- a) Suitable for the population and community for which they are intended; and
- b) Consistent with the purposes of Sexual Risk Avoidance Education (medically accurate, which means referenced in peer-reviewed publications by educational, scientific, governmental, or health organizations).

Describe how applicants will certify that all sexual risk avoidance education materials presented as factual will be grounded in scientific research. Applicants must describe how information shared is medically accurate and aligns with the needs and desired outcomes for the intended audience.

As mentioned above, The Obria Group, Inc. will establish and maintain Information & Education Committees made up of local members. All medical policies and procedures and educational information will be approved by Obria's I & E committee prior to use by clinic and health education personnel, as follows:

1. Obria will have informational and educational material reviewed by an I & E Advisory committee prior to distribution.
2. Obria's I & E Advisory Committee will broadly represent the population or community for whom the materials are intended, including: Race; Color; National origin; Differently-abled condition; Sex; and Age.

3. The committee will consist of five to ten members.
4. The committee will assure that materials provided to clients within the Health Education Program are:
 - a) Suitable for the population and community for which they are intended; and
 - b) Consistent with the purposes of sexual risk avoidance education (medically accurate, which means referenced in peer-reviewed publications by educational, scientific, governmental, or health organizations).
5. The I & E Advisory Committee may delegate responsibility for the review of the factual, technical, and clinical accuracy of materials to appropriate medical staff. All materials which contain any medical information will be medically sourced by a reputable national medical organization, or government agency to ensure accuracy. The final responsibility for approval of I & E material remains with the I & E Advisory Committee.
6. The I & E Advisory Committee will:
 - a) Consider the education and cultural backgrounds of the individuals or community to whom the materials are addressed.
 - b) Consider the standards of the population or community to be served.
 - c) Review the content of the material to assure that the information is factually correct.
 - d) Determine whether the material is suitable for the population or community.
 - c) Establish a written record of its determinations.
6. The I & E Advisory Committee will meet on an “ad hoc” basis to review material.

Provide a plan, if necessary, for incorporating a positive youth development approach, including targeting risk and protective factors in young people's lives that are known to influence sexual activity and address the trauma needs of vulnerable youth.

The Real Essentials curriculum meets targets for educational outcomes for both the Tool to Assess the Characteristics of Effective Sex and STD/HIV Education Programs (TAC) and SMARTool assessment tools. As such, this Obria SRAE program addresses the benefits associated with self-regulation and youth risk behaviors, as follows:

- REAL Essentials utilized scientific best practices and literature sources to frame content regarding STD/HIV prevention.
- REAL Essentials service delivery allows community experts to deliver messaging to best serve the target group from a posture of cultural understanding, risks of population group, linguistic relevance, understanding and expertise.
- REAL Essentials programming focuses on all 3 health goals: STD prevention, HIV prevention, and pregnancy prevention as well as social emotional wellness and self-efficacy.
- REAL Essentials is clear and concrete to appeal to the adolescent brain and utilizes directive teaching strategies for achieving the health goals and engages students with real life examples to practice and experience success when applying refusal skills.
- REAL Essentials addresses multiple sexual risk factors by utilizing a positive youth development approach building protective factors, resiliency and character qualities such as impulse control, emotional regulation, future orientation strategies and, at the same time, teaches the skills necessary to avoid risk, substitute unhealthy behaviors for healthy ones and captivates the heart and mind of the student.

- REAL Essentials utilizes concepts that increase inner locus of control recognizing that behavior change happens most effectively when students operate from intrinsic motivation. This means they have the capacity to personalize the information which is relevant to them and apply it in their life in a way that is meaningful and helpful enabling them to be successful and healthy.
- REAL Essentials targets future goals and opportunities throughout the curriculum. The “success sequence” is highlighted as an important part of sexual risk avoidance.
- REAL Essentials lessons acknowledge the role of high risk situations that place teens in vulnerable situations, identifies these situations, promotes insights for students, and addresses how to mitigate these factors. Teens who have been sexually active then become more aware of vulnerable situations and develop personal strategies to avoid these opportunities.
- REAL Essentials lessons help students learn the skills to make their behavioral intentions clear and concrete to others. REAL Essentials explores what it means to be committed to something. Those commitments of healthy decision-making and self-regulation are strengthened as the curriculum explores a personal understanding of the risks of teen sex and delaying sexual activities.
- The program teaches effective communication and conflict resolution skills as well as the prevention of assault, coercion, and intimate partner violence. REAL Essentials also directs students regarding consent laws and boundary setting.
- REAL Essentials lessons help students explore their attitudes, beliefs and values in a safe, affirming climate of learning and discovery. Lessons outline and highlight the value of

delaying sexual activity as an optimal strategy for adolescents to achieve health and future life success.

Describe how the project will provide education to youth that normalizes the optimal health behavior of avoiding non-marital sexual activity and address how each of the A-F topics outlined in the legislation (see Section I. Program Description, Evidence-based Interventions or Strategies) will be incorporated into program implementation. The description must address how the education is based on adolescent learning and developmental theories for the age group receiving the intervention.

The Obria Group, Inc. Beacon of Light and Obria Medical Clinics affiliates are perfectly positioned to provide education to youth that normalizes the optimal health behavior of avoiding non-marital sexual activity. Obria's SRAE program will provide medical (health) and relationship education in different settings. REAL Essentials teaches reproductive anatomy and physiology utilizing correct anatomical language that is appropriate for target audience. REAL Essentials teaches physical and emotional changes related to growth and development, which also includes the development of the adolescent brain. The curriculum utilizes the whole person approach teaching about personal relationships from a physical, intellectual, emotional, social, spiritual, and financial dimension of health. It teaches the science of healthy relationship development identifying qualities of healthy and unhealthy relationships. The program teaches effective communication and conflict resolution skills as well

as the prevention of assault, coercion, and intimate partner violence. REAL Essentials also directs students regarding consent laws and boundary setting. Topics are age-appropriate as well as scientifically accurate and the content focuses on clear health goals (e.g. the prevention of

STD/HIV and/or pregnancy) as well as instruction and skills regarding specific behaviors leading to these health goals.

REAL Essentials lessons help students explore their attitudes, beliefs and values in a safe, affirming climate of learning and discovery. Lessons outline and highlight the value of delaying sexual activity as an optimal strategy for adolescents to achieve health and future life success. REAL Essential teaches toward the positive, rather than away from the negative. Additionally, REAL Essentials programming has:

- Defined desired outcomes
- Associated risky behavior with known risk factors
- Teach content that is relevant and familiar to the students
- Present the information in an innovative and compelling manner often surprising, engaging and captivating students which realigns their values and beliefs regarding sexual risk avoidance.

REAL Essentials developers involved experts in the field of medicine, public health, primary prevention, and behavioral health in the development of the curriculum. Additional developments utilized scientific best practices and literature sources to frame content regarding STD/HIV prevention. Community data sets and health reports directed the developers in understanding the trends and needs in diverse and high-risk communities before finalizing programs. Community-based partners were pursued for input and expertise to be sensitive to each population group with cultural relevance regarding content and language.

Cite evidence that demonstrates how the selected curriculum and overall proposal systematically applies key program elements that have been found to be effective in positive

youth behavior change, especially as related to delaying initiation of sexual activity, returning to a lifestyle without sex, and/or refraining from non-marital sex.

According to the Center for Relationship Education, REAL Essentials has a growing body of research pointing out the effectiveness of the curriculum promoting sexual delay and overall positive sexual behavior. REAL Essentials has been tested in several settings: The Earle School District in Arkansas, Long Island Teen Freedom Program in New York, and the Pueblo Youth Project in Colorado, among others:

“The Earle School District reported that since the start of the program in 2001, teen pregnancy in the senior class dropped from 1 in 2 girls (2001) to 1 in 10 girls (2009). Participants in the Long Island Teen Freedom Program who were instructed in the REAL Essentials curriculum were nearly 3.5 times more likely than average to delay sexual initiation 12 months after participating in the program. In Pueblo, Colorado the Pueblo Youth Project has been implementing REAL Essentials to their largely Hispanic population of students.”⁴³

The Center for Relationship Education also reports that teachers and parents surveyed disclosed that REAL Essentials has had a substantial impact on teen behaviors and attitudes towards sex, and student survey results confirm this:

“In 2012, 227 randomly selected high school students at South High, County High, and District 60 schools were given follow-up surveys if they had attended a REAL Essentials session in the last 4 years. The results of the surveys were as follows:

- 99% reported the session had a positive effect on their sexual behaviors.

⁴³ The Center for Relationship Education. Retrieved from:
<https://www.myrelationshipcenter.org/resources/tested-effectiveness-real-essentials>

- 63% said they postponed sex due to the skills they learned from REAL Essentials.
- 32% said they used protection due to REAL Essentials.
- 23% said they reduced their number of sexual partners to one partner.

Teens who received REAL Essentials programming were substantially less likely to have had sex (compared to Pueblo Averages published by Pueblo County Health Consortium (PCHC 2007)).

- 24% of 9th graders reported having had sex versus 42% Pueblo average.
- 46% of 10th graders reported having had sex versus 54% Pueblo average.
- 47% of 11th graders reported having had sex versus 61% Pueblo average.

REAL Essentials high school students (age 15-19) are 17% less likely (than Pueblo averages) to be sexually active after the program.”⁴⁴

Also, The Center for Relationship Education, in Weld County, Colorado, the REAL Essentials curriculum reported great success: “...a baseline data set was reviewed and recorded by the Weld County Health Department. At the end of the five-year period, with no other teen pregnancy initiatives being implemented in the county, teen pregnancy was reduced by 25%. Monetizing that reduction for costs related to teen labor and delivery expenditures, county officials reported that the county saved \$4,457,932 dollars over the 5-year project. This development was written up as a ROI case study and is available upon request.”⁴⁵

Describe the range of mechanisms that will be used to deliver services (i.e., school-based programs and/or youth development programs). The description must identify referral

⁴⁴ The Center for Relationship Education. Retrieved from: <https://www.myrelationshipcenter.org/resources/tested-effectiveness-real-essentials>

⁴⁵ The Center for Relationship Education. <https://www.myrelationshipcenter.org/resources/tested-effectiveness-real-essentials>

resources, include information about how referrals will be made to other services and programs, and how follow up will take place, when appropriate. Referral resources should include, but not be limited to, substance use and abuse and mental health services.

The Obria Group, Inc. and its grant subrecipients will utilize The Center for Relationship Education REAL (Relationship Education and Leadership) Essentials curriculum to meet the needs of youth and families, as follows:

- **Telehealth:** Obria's target demographic – young people ages 15-25 engaged in risky sexual behavior – are among the most digitally savvy market segment in generations. They have grown up with information at their fingertips (quite literally) through smartphones, tablets, and computers. Their circle of influence centers on social media; they rely on instant communication via texting and smartphone apps; and they are increasingly looking for online access to healthcare resources. Obria's goal is to pro-actively market and find youth (through smartphone apps and social/digital media) and instantly connect them online to a live Obria medical or health education professional. An Obria nurse or health education professional can counsel them, build a trusting relationship, then direct them to further care at a brick-and-mortar Obria clinic. In other words, this “click and mortar” strategy is to increase the patient traffic into Obria's life-affirming medical affiliates and, ultimately, to educate and change more lives using the REAL Essentials Health curriculum.
- **School and Community Presentations:** presentations will be provided to schools, colleges, community groups, and faith communities. The lessons are age-appropriate, and science-based. The concepts are clear and concrete, aligning with the development of the teenage brain. All Obria Medical Clinics affiliates and Beacon of Light will partner with

school districts and community organizations to provide presentations and Sexual Risk Avoidance Education to youth. Obria will utilize three different REAL Essentials curriculums to provide the following presentations: Starting Point for children between 4th and 8th grade; REAL Essentials Advance for youth from 8th to 12th grade; and, REAL Essentials Life for Young Adults or college students.

- **One-to-one meetings called “Relationship Coaching,” for parents, youth, and young adults:** each counseling session will impart age-appropriate information and skills to equip families with the techniques that encourage family participation in decision-making towards sexual risk avoidance and healthy relationship education as part of their family planning services. The Relationship Coaching sessions in the clinical setting will utilize the REAL Essentials Health curriculum. It addresses a variety of science -based components for life and love skills for adolescents and adults. Designed for medical centers and health clinics it captivates and engages clients with issues of the heart while imparting the skills necessary for healthy romantic and family attachments. During the coaching sessions, trained and certified facilitators will work with clients to design a plan of action to increase their physical, intellectual, emotional, social and financial health while helping them connect to social supports and additional services as needed. One-to-one Relationship Coaching will be provided to parents as well as with their children creating a two-generation approach. Equipping parents with science-based and practical tools to increase the health, safety, and well-being of their child/children is of paramount importance. They will also be encouraged, cared for and supported continuously through these coaching sessions.

Through this program, Obria will encourage family participation in the decision of minors to engage in healthy behaviors, promote the success sequence, and provide counseling to minors on how to resist attempts to coerce minors into engaging in sexual activities. If clients require additional support, mental health or legal services for sexual exploitation or coercion, or intimate partner violence referrals will be made.

It is the policy of Obria to be responsive to the physical and psychological needs of our patients and to assist them in obtaining the appropriate resources corresponding to their specific needs. Obria is obligated to follow the laws of the state in which it operates regarding the reporting of suspected cases of abuse (sexual, physical, emotional, and mental) and neglect of patients and those associated with patients. All Obria staff is adequately trained within 30 days of employment and retrained annually on how to identify victims of any type of abuse. Obria's reporting policy has the following objectives:

- To be able to recognize and identify victims of abuse
- To understand what needs to be done to comply with the local laws
- To provide written documentation of any suspected or alleged patients who are victims of abuse or neglect, elder abuse, and/or victims of domestic violence
- To assist patients who may be dealing with abuse, neglect or domestic violence by referring them to the appropriate agencies or organizations

Also, sexual abuse is suspected if the following is observed:

- A minor 14 and under reports sexual activity
- Sexual activity with a parent or family member
- A pregnant girl under 18 who is evasive about her partner

Obria's staff is trained and knowledgeable of Child Protective Services Guidelines within their state. Obria's personnel are mandated reporters in situations involving sexual assault or domestic violence. Any abuse complaint must be initiated by or verbally mentioned by the victim.

The Obria Group, Inc. Beacon of Light and Obria Medical Clinics affiliates emphasize collaborative approaches to address the social determinants of health, improve healthcare delivery, produce systemic changes to break the cycle of poverty, and strengthen men, women, and adolescents. In fact, collaboration is a goal outlined in Obria's strategic plan. Obria is actively seeking and establishing partnerships and collaborations in the community to better serve its clientele in a comprehensive and holistic approach. Obria has an extensive history of community partnerships, and currently offers services as part of several formal collaborations. Currently, Obria clinic sites refer patients to local hospitals, free primary health care clinics, family resource centers, and federally qualified health clinics, among others.

Obria will formalize partnerships in the community and implement new procedures, as follows:

1. Plan to address the related social service and medical needs of clients as well as ancillary services needed to facilitate clinic attendance.
2. Establish collaborative agreements with relevant social service referral agencies, for example: child care agencies, transport providers, WIC programs.
3. Coordinate with and refer clients to other providers of health care services, which may include local health and welfare departments, hospitals, voluntary agencies, and health services projects supported by other federal programs.

4. Formalize collaborative agreements with other relevant referral agencies, including: emergency care, HIV/AIDS care and treatment agencies, infertility specialists, and chronic care management providers, and providers of other medical services not provided on-site.
5. Document through Medical records when referrals are made based on documented specific condition/issues.

Provide a detailed, thorough, and realistic description of the recruitment and retention plan of youth ages 10-19. The approach described must be specific for the target population, service delivery location, and implementation setting.

The Obria Group, Inc. will implement activities to recruit and retain youth and overcome barriers to their involvement by publicizing the program (online and marketing materials), offering food and/or obtaining consent. REAL Essentials certifies educators/youth serving personnel who have access to students in a school-based setting or who are involved in collaborative community-based partnerships. Obria will implement its SRAE program in settings that have social supports, programming and services such as transportation vouchers and free and reduced lunch programs because they allow for the curriculum to be implemented in environments where patients and students are already involved. REAL Essentials is designed to be implemented in high risk or under-resourced communities such as residential treatment centers, shelters, juvenile justice centers, and through foster care and kinship networks.

The Obria Group, Inc. will develop a master written community education and service promotion plan to effectively promote its SRAE program (e.g., media spots/materials developed, SEO/SEM online marketing, event photos, participant logs, and monitoring reports). Obria will promote sexual risk avoidance education services with local churches, community organizing agencies, community health centers, legal services providers, nonprofit hospitals, local workforce

development agencies, youth services/youth development organizations, family resource centers and human services providers for families, child welfare organizations, community development organizations, and anti-poverty organizations, among others.

Provide a clear justification of the estimate of the overall program participants in each year of the project. Applicants must include a description of the types of participants by age groups or grades, race, ethnicity, and other descriptive factors.

Affiliate	State	Locations	Participants	Age	Ethnicity
Obria – Pacific Northwest	WA	3 health clinic sites and a mobile unit	15,000 per year	11-19	White 50% Hispanic 25% African American 10% Asian 10% Other 5%
Obria – Real Options	CA	4 health clinic sites	4,000 per year	11-19	White 25% Hispanic 40% African American 15% Asian 15% Other 5%
Obria – WPC	CA	2 health clinic sites	1,000 per year	11-19	White 30% Hispanic 45% African American 10% Asian 10% Other 5%
Obria SoCal	CA	3 health clinics and a mobile unit	1,000 per year	11-19	White 25% Hispanic 45% African American 15% Asian 10% Other 5%
Beacon of Light	CA	1 location serving several school districts in Southern California.	10,000 per year	11-19	White 25% Hispanic 45% African American 15% Asian 10% Other 5%

Applicants must provide a detailed description of the organizational executive leadership and the existing staffing structure or a proposed staffing plan that will support full program implementation within 90 days of grant award. The applicant must provide a succinct plan

to monitor the effective management and coordination of activities by any partners, contractors and subcontractors, and consultants, if applicable.

Kathleen Eaton Bravo is the founder and CEO The Obria Group, Inc. Kathleen established Obria Medical Clinics in 1981, one of the largest networks of life-affirming sexual and reproductive health care clinics in Southern California. Kathleen will be responsible for the overall implementation of Obria' SRAE program. Other key program staff involved in the implementation of Obria SRAE project, is as follows:

Program Director: Mauricio Leone, MPA, SRAE will oversee the implementation of SRAE projects at each Obria Medical Clinic locations across California and Washington. Mauricio has more than four years of experience implementing health and health education programs. He has a Master's in Public Administration from the University of Texas, San Antonio and a certificate in Sexual Risk Avoidance Education from Ascend. He will provide grant management, implementation of the Obria's SREA Review Tool, perform quality control and compliance, provide new policies and procedures, oversee the implementation of information and education advisory committees, and oversee the training of medical professionals.

Health Education Manager: (b)(6) will oversee the day-to-day implementation of the REAL Essentials curriculum in all Obria Medical Clinics affiliates across the nation. (b)(6) will also be responsible for training all health education facilitators. (b)(6)

(b)(6)

(b)(6)

(b)(6) will be responsible for the successful implementation of Center for Relationship Education health education programs at the clinic, school and community settings.

(b)(6)

(b)(6) will be responsible for training Beacon of Light and Obria affiliates clinical staff to perform

health education and support services (b)(6) will also be responsible for implementing Obria's Information & Education Advisory Committees at each Obria affiliate. And track program performance.

Marketing Manager: (b)(6)

(b)(6)

(b)(6) will be responsible for developing and implementing the community information and education program plan for Beacon of Light and each Obria Medical Clinic affiliate (b)(6) will be responsible for conducting periodic assessment of the needs of each of Obria's geographic region about their awareness of and need for access to Sexual Risk Avoidance Education (b)(6) will also be responsible for the development and implementation of an Obria SRAE community education and service promotion plan.

Obria's REAL Essentials Master Trainer will also be responsible for monitoring program fidelity across all Obria affiliates and Beacon of Light SRAE sites. The Master Trainer will train all Obria Health Education staff to successfully implement REAL Essentials program requirements. Obria's REAL Essentials Master Trainer will impart best practices for implementation and fidelity to content. In addition, REAL Essentials was specifically designed with replicable and directive objectives as well as step-by-step instructions to ensure program fidelity and eliminate inconsistent messaging to program participants. The curriculum certification training dedicates one entire session of the training to implementation, service delivery, scope and sequence, attendance records, evaluation protocols, passion and fidelity. Lastly, program authors reserve the right to revoke certification for any educators who do not follow teaching protocols.

Applicants must describe the strategies that are culturally and linguistically responsive to the target population(s), to be used to effectively recruit and retain youth participants.

Identify all methods utilized that will ensure facilitators/educators who will deliver the program(s) have been or will be formally trained in the proposed SRA program model and/or strategies, key research-based program elements that have been found to be effective in positive youth 26 of 52 behavior change (especially as related to delaying initiation of sexual activity, returning to a lifestyle without sex, and/or refraining from non-marital sex. And other related youth risk and protective factors)

Obria's multidisciplinary team of health and education professionals are highly trained and have the knowledge, skills and abilities to provide quality care in a culturally and linguistically appropriate manner to all individuals and families seeking sexual and reproductive health care and health education regardless of creed, race, religion, insurance status, or ability to pay. They are also specially trained to provide in-depth and culturally appropriate health education and support through one-on-one consultations at any Obria clinic settings and referrals to community resources and/or partners. All Obria affiliates recruit health educators that mirror the ethnic and linguistic characteristics of the target population.

The Obria Group, Inc., Beacon of Light and Obria affiliates will implement written policies that clearly indicate that, whenever possible, grant subrecipients will have health educators that mirror the population that they serve in terms of ethnic, racial and language characteristics.

Obria's SRAE program director, Mauricio Leone, is a SRAE certified specialist. Mauricio was certified as a SRAE specialist by Ascend, which is the nation's leader in the sexual risk avoidance education field. The Obria Group, Inc. will hire a full time REAL Essentials Master Trainer to implement the REAL Essentials curriculum and train all Obria Medical Clinics health educators in a 16-hour, two-day certification seminar. All Obria health educators across California and Washington will be required to be formally trained in the REAL Essentials curriculum. Obria's

Master Trainer will walk educators through objectives, materials, and step by step instructions with modeling and interactive execution to ensure each facilitator leaves fully equipped and confident in their ability to implement the content.

Additionally, The Obria Group, Inc. will send the Obria's SRAE program director and health education manager to the 3-day Adolescent Pregnancy Prevention (APP) Program Grantee Conference held in the Washington, DC, area and to a minimum of one of three topical training sessions offered in each year of the 24-month project period.

The Obria Group, Inc. and Ascend will partner to provide four sexual risk avoidance certification trainings in Southern California (1), Central California (1) and Washington (2). All facilitators will be required to attend and obtain the Ascend SRAE certification.

The Obria Group, Inc. and Obria affiliates will implement written policies that clearly indicate that Obria affiliates will work with properly trained health educators. Obria affiliates will maintain records indicating the completion of such training in each employee's personnel file.

6. Program Performance Evaluation Plan

Quantitative and qualitative methods of evaluation are needed and will be used to measure project outcomes. Program measures will also help identify program strengths and weaknesses to improve and assess if the program is maintaining and achieving its originally planned objectives. An Obria quality improvement team will oversee the evaluation process and ensure that Obria's SRAE program is meeting all critical elements, goals, and objectives during its implementation. Obria's quality improvement team will implement a formative evaluation approach. In addition, The Obria Group, Inc. and Obria affiliates will implement the required FYSB performance measure data to monitor the extent to which the programs are being implemented according to the SRAE objectives when finalized and approved by the OMB. The Obria Group, Inc. will be responsible for collecting

data from all grant subrecipients (Beacon of Light and Obria Medical Clinics affiliates in Washington and California) and report on performance measures twice a year.

The Obria Group, Inc. will track and collect data from five broad categories of performance measures to comply with FYSB data reporting requirements, as follows:

(1) Output measures: The Obria Group, Inc. Beacon of Light and Obria Medical Clinics affiliates will keep track of number of youth served; hours of service delivery; number of presentations; number of presentations at schools; number of presentations at community organizations; number of telehealth visits; number of clinic visits; number of health education facilitators; number of health education facilitators trained);

(2) Fidelity/adaptation: Obria's Health Education Manager and Master Trainer will be responsible for making sure that Obria's SRAE program is being implemented correctly. REAL Essentials was specifically designed with replicable and directive objectives as well as step-by-step instructions to ensure program fidelity and eliminate inconsistent messaging to program participants. The REAL Essentials program authors reserve the right to revoke certification for any educators who do not follow teaching protocols.

(3) Implementation: The Obria Group, Inc. Beacon of Light and Obria affiliates will track information regarding the number of community partnerships: schools and other community organizations willing to implement the curriculum in their facilities; number of health educators trained by a REAL Essentials Master Trainer and evidence of competence in working with the identified population);

(4) Outcome measures: The Obria Group, Inc. Beacon of Light and Obria affiliates will use measuring tools (pre- and post-questionnaires) to measure behavioral and attitudes changes and

improvements in knowledge, and intentions). Grant subrecipients will also conduct focus groups with program participants, parents and other stakeholders.

(5) Community data: The Obria Group, Inc. Beacon of Light and Obria Medical Clinics affiliates will keep track of improvements on STI rates, teen birth rates, substance use rates, and other rates of risk behavior. The Obria Group, Inc., Beacon of Light and Obria Medical Clinics affiliates agree to collect information related to the performance measures and report the data to Families and Youth Services Bureau.

7. Organizational Capacity (e.g., resumes, job descriptions, organizational charts)

Obria's multidisciplinary team of health and health education professionals are highly trained and have the knowledge, skills and abilities to provide quality care in a culturally and linguistically appropriate manner to all individuals and families seeking sexual and reproductive health care regardless of creed, race, religion, insurance status, or ability to pay. They are also specially trained to provide in-depth and culturally appropriate health education and support through one-on-one consultations at any Obria Medical Clinic settings and referrals to community resources and/or partners. Key program staff is as follows:

Program Director: Mauricio Leone, MPA, SRAE will oversee the implementation of SRAE projects at each Obria Medical Clinic locations across the country. Mauricio has more than four years of experience implementing health and health education programs. He has a Master's in Public Administration from the University of Texas, San Antonio and a certificate in Sexual Risk Avoidance Education from Ascend. He will provide grant management, implementation of the Obria's SREA Review Tool, perform quality control and compliance, provide new policies and procedures, oversee the implementation of information and education advisory committees, and oversee the training of medical professionals.

Health Education Manager: (b)(6) will oversee the day-to-day implementation of the REAL Essentials curriculum in all Obria Medical Clinics affiliates across the nation. (b)(6) will also be responsible for training all health education facilitator. (b)(6)

(b)(6)

(b)(6) will be responsible for the successful implementation of Center for Relationship Education health education programs at the clinic, school and community settings.

(b)(6) will be responsible for training Obria affiliates clinical staff to perform health education and support services. She will also be responsible for implementing Obria's Information & Education Advisory Committees at each Obria affiliate. And track program performance.

Marketing Manager: (b)(6)

(b)(6)

(b)(6) will be responsible for developing and implementing the community information and education program plan for each Obria Medical Clinic affiliate. (b)(6) will be responsible for conducting periodic assessment of the needs of each of Obria's geographic region about their awareness of and need for access to Sexual Risk Avoidance Education. (b)(6) will also be responsible for the development and implementation of an Obria SRAE community education and service promotion plan.

Personnel at Obria's SRAE sites:

Nurse Practitioners: will manage all the medical day-to-day operations of the health clinic, maintaining effective patient flow and assuring all medical services are consistent with the clinic's mission and philosophy as well as implementation and maintenance of clinic policies and

procedures related to medical matters. Nurse practitioners will be trained to implement the REAL Essentials Health curriculum in clinic settings.

Registered Nurses: will implement best medical practices in clinic services and patient care; oversees patient database accuracy, patient files and conducts annual audits to ensure compliance; and, provides staff training quarterly or as needed. Registered Nurses will be trained to implement the REAL Essentials Health curriculum in clinic settings.

Health Education Managers and Facilitators: They will be responsible for the implementation of REAL Essentials curriculums in school and community settings. All health education facilitators will be properly trained by the REAL Essentials Master Trainer and Ascend. They will reflect the community that they serve in terms of language, race and ethnicity.

Project Director, Mauricio Leone, MPA	(b)(6)				

Health Education Manager: One FTE Health Education Manager, (b)(6) will be responsible for the successful implementation of Obria's health education plan (b)(6) will assist the program director and Obria affiliates in the implementation of SRAE projects at each Obria affiliate (b)(6) will also work as the liaison between The Obria Group, Inc. and sub-contractors (Obria affiliates and Beacon of Light). The plan includes the implementation of the Center for Relationship Education health education curriculums and training (b)(6) will be responsible for training Obria affiliate sites clinical and health education staff to perform all health education and support services including in this proposal (b)(6) will also be responsible for implementing Obria's Information & Education Advisory Committees, and track program performance.

The Obria Group, Inc. makes the specific commitment of covering 30% of year time or salary to this project.

Position Title and Full Name	Percent Time	Annual Salary	Federally-funded Salary	Non- federal Salary	Total Project Salary
Project Manager, (b)(6)	(b)(6)				

In addition to salaries, personnel costs assume a benefit rate of 20%. This includes Worker's Compensation contributions to employee 401k retirement accounts; taxes, and employee benefits.

Object Class:	Federal Funds	Non-federal Funds	Total Budget
Fringe Benefits+ Taxes			
Fringe Benefits + Taxes	(b)(4)		

Breakdown of the amounts and percentages that comprise fringe benefit costs such as health insurance, Federal Insurance Contributions Act (FICA) taxes, retirement insurance, and taxes.

- Worker's Compensation (b)(4)
- Contributions to employee 401k retirement accounts (b)(4)
- Taxes (b)(4)
- Health Insurance (b)(4)

Travel Description: Funds are requested for the Project Director and Health Education Manager to visit each affiliate sites across the nation for the implementation of 13 SRAE project sites in California and Washington. These employees are expected to oversee the implementation of the project at each Obria affiliate sites as described in the proposal. These project employees will meet with Obria affiliates site employees twice a year during the period of the project. These meetings involve sharing the accomplishments of the past months, discussing present and future goals and

objectives, and assigning specific tasks and responsibilities for the next period. The visits will also include the implementation of Obria's Review Tool, perform quality control and compliance, provide new policies and procedures, oversee the implementation of information and education advisory committee advice, and oversee the training of medical and health education professionals.

Object Class: Travel	Federal Funds	Non-federal Funds	Total Budget
Travel	(b)(4)		

Funds are budgeted for the Project Director, and Health Education Manager to visit each affiliate location twice per year to collaborate with colleagues, provide training and perform quality control and compliance. Approximate travel costs are as follows:

Obria Real Options	San Jose, CA

Contractual Description & Justification: The Obria Group, Inc. will issue sub awards to five contractors (Obria Medical Clinics affiliates and Beacon of Light) to help carry out Obria’s SRAE project awarded to The Obria Group, Inc. A sub award relationship is described in the grant proposal and supporting documents. It will be consummated until after the award has been made to The Obria Group, Inc. which is submitting the prime proposal.

The Obria Group, Inc. will have agreements with five contractors (Obria affiliates and Beacon of Light) to work collaboratively on Obria's SRAE Project. The Obria Group, Inc.'s Project Director will be the legal contact with the FYSB.

The characteristics of an Obria sub-recipient include:

- Obria Medical Clinics affiliates are committed to carrying out a portion of the scope of work, which includes the provision of direct SRAE services to patients.
- Beacon of Light committed to carrying out a portion of the scope of work, which includes the provision of direct SRAE services to students.
- Each Obria sub-recipient will collaborate with The Obria Group, Inc (main recipient) on the project; both The Obria Group, Inc. and the Obria sub-recipients have project personnel involved, though The Obria Group, Inc is the lead institution.

The Obria Group, Inc. will obtain the following from the sub-recipient institution:

- A brief description of the scope of work proposed by the sub-recipient
- A detailed budget. Budget includes direct costs for the sub-recipient.
- A Letter of Commitment bearing the signature of the sub-recipient institution's authorized official at the sub-recipient organization stating that it is willing to abide by The Obria Group, Inc. terms should an award be made.
- Other documentation as required, such as the key personnel curriculum vitae as well as current and pending support.
- The proposed sub-recipient includes its total costs in its submission to The Obria Group, Inc. for inclusion in The Obria Group, Inc. proposal to the FYSB.

The costs associated with each sub-recipient' commitment for the implementation of the project are as follows:

Sub-Recipient	Federal Funds	Non-Federal Resources	Total Budget
Obria - Real Options (RO), California	\$69,484	(b)(4)	
Obria – Women Pregnancy Care (WPCC), California	\$40,303		
Obria – Southern California Inc. (OMC SoCal), California	\$70,165		
Obria – Pacific Northwest (PNW), Washington	\$187,328		
Beacon of Light – California	\$70,260		
Total Sub-Recipients	\$437,540		

The Obria Group, Inc. will implement the following standards for this project:

1. A written agreement between The Obria Group, Inc. and sub-recipients (Obria Affiliates and Beacon of Light) that is consistent with FYSB requirements and approved by the grantee.
2. Sub-recipient agreement is approved by the grantee.
3. The Obria Group, Inc. will have a monitoring plan to ensure sub-recipient entity is providing SRAE according to FYSB and Obria's SRAE program elements.
4. Documentation will show that The Obria Group, Inc. is monitoring the service sites bi-annually for compliance to FYSB requirements and program elements.

Other Justification:

- **6 Real Essentials Curriculum Certification Training** per year (10 participants per training; 3 trainings in California and 3 trainings in Washington)

60 participants will receive curriculum and a 2-day REAL Essentials certification training.

- Host Training Fee: (b)(4)
- Curriculum: (b)(4)
- Participant Training Fee: (b)(4)
- Total: (b)(4) Request to FYSB = (b)(4)

Object Class	Federal Funds	Non-Federal Resources	Total Budget
RE Curriculum Certification	(b)(4)		

Funds are requested to provide REAL Essentials training to at least (b)(4) health care providers, health educators, patient care coordinators and volunteers to provide REAL Essentials sexual risk avoidance education in different social settings, including high schools, community events and churches, among others. Each training will be provided for affiliates across California and Washington by Obria's Health Education Manager in partnership with the Center for Relationship Education. The grant will also provide funding to purchase REAL Essentials Health, Starting Point 4th-8th grade, and Advance 8-12th grade curriculums to students. Each curriculum is designed to help health care providers and health educators provide sexual risk avoidance education in clinic settings.

- **Essentials workbooks for students**

31,000 students (15,000 students in Washington and 16,000 students in California) will receive a workbook for REAL Essentials. For cost effectiveness, The Obria Group, Inc. will secure a licensing agreement and print the workbooks locally.

- Annual Licensing fee: (b)(4) (includes the first 250 workbooks)
- Additional workbook royalty:

- (b)(4)

- Printing (b)(4)

- Total: (b)(4) Request to FYSB = (b)(4)

Object Class	Federal Funds	Non-Federal Resources	Total Budget
RE Workbooks for students	(b)(4)		

Funds are requested to purchase a licensing agreement with the Center for Relationship Education to print 31,000 REAL Essentials workbooks locally.

- **4 Sexual Risk Avoidance Education Certification Training** per year (70 participants per training; 2 trainings in California and 2 trainings in Washington)

280 participants will receive curriculum and a 2-day Ascend SRAE certification training.

- Host Training Fee (b)(4)

- 4 Training Locations (b)(4)

- Participant Training Food: (b)(4)

- Total: (b)(4) Request to FYSB = (b)(4)

Funds are requested to provide Ascend Sexual Risk Avoidance Education certification training to at least (b)(4) health care providers, health educators, and patient care coordinators to provide evidence-based sexual risk avoidance education in different social settings, including high schools, community events and churches, among others. Each training will be provided for affiliates across California and Washington by Obria's Health Education Manager in partnership with Ascend.

Object Class	Federal Funds	Non-Federal Resources	Total Budget
Ascend Certification Training	(b)(4)		

10. Plan for Oversight of Federal Award Fund

The Obria Group, Inc. will create written policies and procedures to exercise effective control over and accountability of federal funds. Its purpose will be to ensure that assets are safeguarded, that financial statements are in conformity with generally accepted accounting principles (GAAP), and that finances are managed with responsible stewardship. All personnel with a role in the management of The Obria Group, Inc. fiscal operations are expected to uphold these policies.

The Obria Group, Inc. will require that grant subrecipients (Obria Medical Clinics affiliates and Beacon of Light) follow written policies and procedures for grant award accounting and management as well. In managing federal funds, The Obria Group, Inc. will use and enforce the following policies and procedures:

- (a) The Obria Group, Inc. is responsible for the efficient and effective administration of the grant award through the application of sound management practices.
- (b) The Obria Group, Inc. assumes responsibility for administering Federal funds in a manner consistent with underlying agreements, program objectives, and the terms and conditions of the grant award.
- (c) The accounting practices of The Obria Group, Inc. will be consistent with FYSB accounting management regulations and will provide for adequate documentation to support costs charged to the grant award.
- (d) All transactions performed by The Obria Group, Inc. and subrecipients associated with the grant award funds will be adequately documented.
- (e) Any request by a subrecipient for prior approval will be addressed in writing to The Obria Group, Inc. The Obria Group, Inc. will promptly review such request and approve or disapprove the request in writing. The Obria Group, Inc. will not approve any budget or project revision which

is inconsistent with the purpose or terms and conditions of the Federal grant award to The Obria Group, Inc. If the revision, requested by the subrecipient would result in a change to The Obria Group's approved project which requires Federal prior approval, The Obria Group, Inc. will obtain the HHS awarding agency's approval before approving the subrecipient's request.

(f) The Obria Group, Inc., will employ the following specific management techniques to assure proper and efficient administration of the grant award:

- Only use funds when properly needed.
- Collect remitted quarterly draw requests from sub recipients.
- Review for appropriate format and reasonableness within grant award guidelines.
- Prepare and submit wire transfers to disburse funds to subrecipients.
- Collect remitted quarterly fund reconciliation reports and back up documentation from subrecipients.
- Review for appropriate format, footing and verification of proper back up documentation
- Consolidate fund reconciliation reports to total grant award funds.
- Prepare and submit quarterly online grant reporting required by grant guidelines.

In addition, The Obria Group, Inc. and subrecipients will implement the following procedures for financial accountability and management:

(a) All payments made by the FYSB will be recorded in accounting records separate from the records of all other grant funds, including funds derived from other grant awards. The Obria Group, Inc. will account for the sum of all amounts paid by presenting or otherwise making available evidence satisfactory to the FYSB of expenditures for direct and indirect costs. Obria will use

QuickBooks accounting software. QuickBooks allows for segregation of funds and revenues and expenses by cost. It also provides the necessary structure to account for unrestricted, temporarily unrestricted, and permanently restricted net assets, according to GAAP and in compliance with necessary accounting and auditing standards.

(b) The Obria Group, Inc. and subrecipients will have a system to adequately safeguard revenue and other assets through separation of duties. No one person will have complete control over one key function or activity.

(c) An external accounting company (Redwitz accounting services) will oversee the preparation of monthly and quarterly financial reports and, along with the CEO, presents them to the Board of Directors' Finance Committee and management team. The financial reports will include year-to-date expenditures, comparisons against budget, and monthly activities. The Board of Directors will review these reports on a bi-monthly basis. The CEO will oversee the accounting and finance department operations and the implementation of the Board-approved financial policies and procedures, which are updated once each year. To ensure accuracy of the financial reports, accounts will be analyzed and reconciled monthly. Applicable policies and procedures are also documented and reviewed regularly by the Finance Committee of the Board of Directors.

Obria will also ensure that an independent audit is performed each year. Audited financial statements are available to the public and are in full compliance with generally accepted accounting principles (GAAP). An organization's independent auditing firm will ensure that the organization is financially viable, and that accounting policies and procedures and internal controls are compliant with GAAP.

(d) The Obria Group, Inc. and subrecipients will have systems must be in place that allow for review and reconciliation of funds.

(e) The Obria Group, Inc. and subrecipients will have accounting records that will be supported by source documentation such as cancelled checks, paid bills, payrolls, time and attendance reports, contract and sub-contract documents, etc.

11. Project Sustainability Plan

The Obria Group, Inc. is one of the most successfully funded non-profit organizations in California, securing and maintaining funding for its numerous projects and services. Many of Obria's innovative projects and programs have been implemented with support from foundations and private donors and have been successfully sustained beyond grant-funding periods. The Obria Group, Inc. and subrecipients also hold fundraising events each year, including a fall Gala. Additionally, private support from individual donors and corporations has been crucial to ensure Obria's continuation of quality, compassionate and non-judgmental services to youth in need. To achieve financial sustainability, The Obria Group, Inc. has a fundraising plan in place to support its programs and services. The fundraising plan include:

- Development of a multilevel fundraising strategy (donor upgrade/retention; new donor acquisition, board engagement in development; segmentation of donor database; donor recognition);
- Establish goals for each strategy including a target audience (donors according to their level of giving); establish actions steps for achieving the goals; establish team responsible for the implementation of each strategy; established timelines for the achievement of each goal; and establish costs associated with each strategy.
- Establish church and community outreach to partner with local churches and community foundations.

- Donor development meetings and a Donor Development committee and Board Task Force were established to reinforce the successful implementation of the Obria's multilevel fundraising plan.
- Obria segmented all donors according to their level of giving and each donor segment was assigned to a specific donor relationship team member(s) who will be responsible for building and cultivating relationships with donors. These teams include the Board of Directors, CEO, and donor development staff.

The Obria Group, Inc. and subrecipients (Obria Medical Clinics) are expecting to generate income from medical services via fee-for-services, sliding fee scale and reimbursements from health insurance companies from eligible patients. All Obria Medical Clinics will maximize federal and state funding for health care through third party reimbursement (Medi-Cal). The Obria Group, Inc. and Obria affiliates estimate that approximately 10,650 patients per year will be eligible for payments as follows:

- Fee-for-services: \$198,000
- Sliding fee scale: \$200,000
- Health insurance reimbursements: \$400,000

In addition, The Obria Group, Inc. and subrecipients will be approaching government agencies and family and community foundations to raise funds via grants. Obria will seek, research, and apply for new founding opportunities at the local, state, and national levels on an ongoing basis to sustain its programs and services. The Obria Group, Inc. will approach the following foundations and agencies for additional support:

- 1.
- 2.
- 3.
- 4.

(b)(4)

5. (b)(4)
6. (b)(4)
7. (b)(4)
8. Title X HHS grant: \$12 million
9. (b)(4)
10. (b)(4)
11. (b)(4)

CERTIFICATION REGARDING LOBBYING

Certification for Contracts, Grants, Loans, and Cooperative Agreements

The undersigned certifies, to the best of his or her knowledge and belief, that:

(1) No Federal appropriated funds have been paid or will be paid, by or on behalf of the undersigned, to any person for influencing or attempting to influence an officer or employee of an agency, a Member of Congress, an officer or employee of Congress, or an employee of a Member of Congress in connection with the awarding of any Federal contract, the making of any Federal grant, the making of any Federal loan, the entering into of any cooperative agreement, and the extension, continuation, renewal, amendment, or modification of any Federal contract, grant, loan, or cooperative agreement.

(2) If any funds other than Federal appropriated funds have been paid or will be paid to any person for influencing or attempting to influence an officer or employee of any agency, a Member of Congress, an officer or employee of Congress, or an employee of a Member of Congress in connection with this Federal contract, grant, loan, or cooperative agreement, the undersigned shall complete and submit Standard Form-LLL, "Disclosure of Lobbying Activities," in accordance with its instructions.

(3) The undersigned shall require that the language of this certification be included in the award documents for all subawards at all tiers (including subcontracts, subgrants, and contracts under grants, loans, and cooperative agreements) and that all subrecipients shall certify and disclose accordingly. This certification is a material representation of fact upon which reliance was placed when this transaction was made or entered into. Submission of this certification is a prerequisite for making or entering into this transaction imposed by section 1352, title 31, U.S. Code. Any person who fails to file the required certification shall be subject to a civil penalty of not less than \$10,000 and not more than \$100,000 for each such failure.

Statement for Loan Guarantees and Loan Insurance

The undersigned states, to the best of his or her knowledge and belief, that:

If any funds have been paid or will be paid to any person for influencing or attempting to influence an officer or employee of any agency, a Member of Congress, an officer or employee of Congress, or an employee of a Member of Congress in connection with this commitment providing for the United States to insure or guarantee a loan, the undersigned shall complete and submit Standard Form-LLL, "Disclosure of Lobbying Activities," in accordance with its instructions. Submission of this statement is a prerequisite for making or entering into this transaction imposed by section 1352, title 31, U.S. Code. Any person who fails to file the required statement shall be subject to a civil penalty of not less than \$10,000 and not more than \$100,000 for each such failure.
